

The Constitution.

ROUNDABOUT IN GEORGIA.

The tulip tree will soon be in bloom.
The bumble-bee is tuning up his bumble.

We almost feel like remarking to gentle Annie (of Covington) that the spring time has come.

The Augusta Chronicle has some exceedingly timely remarks with respect to the trapping of game birds in this state. It ought to be a stop to that.

A little three-year old daughter of Mr. William Hall, of Elbert county, was killed by lightning the other day.

Captain Jerry Rich, of Athens, is making some very successful raids among the moonshiners.

The recent wet weather has seriously damaged the roads in some of the upper counties.

A correspondent of the Elberton Gazette says the congressional contest in the 9th district will be very exciting.

Dallas has horse races and shooting matches.

Judge Gibson is presiding in the northern circuit. Judge Pottle, we gather from various intimations, is finding a new baby.

The grass about Lexington is growing green.

The LaGrange Reporter remarks in passing that THE CONSTITUTION "leads the Georgia press as to newness." The editor of the Reporter is a good judge in matters of this kind.

Thursday the names of eight new subscribers were added to the list of THE WEEKLY CONSTITUTION, and it didn't seem to be a remarkable good day for subscribers either. Let the review proceed.

A little son of Colonel James A. Broome, of Georgia, died last week.

The corner-stone of a colored schoolhouse will be laid next week.

A colored eloquence was one of the sensations of Dalton last week.

Eastman has a new passenger depot.

A Philadelphian hoodlum was arrested in Savannah recently. His name is Freiderberg, and he had been stealing money in Florida.

Oochran had a little fire the other day.

The Houston (Texas) Age, eloquently remarks: "The Georgia CONSTITUTION we mean the great newspaper of that name published at Atlanta. We quote so frequently, and sometimes without credit, from THE CONSTITUTION that we feel constrained to give it a gratuitous and deserved advertisement. We regard it as among our very best exchanges, north or south, and we advise our Texas Georgia friends to send forthwith for their great state paper."

The yield of the mines at Dahlonega exceed the most sanguine expectations, and are improving as they are developed.

The Gainesville Eagle is informed that the portion of the celebrated sand vein on the Findley lead now being worked averages one hundred dollars per diem—which is equivalent to \$10 per stamp—equal to the yield of any of the gold mines of the Rocky mountains. At present but few of the numerous rich mines of that section are being worked. The time is not far distant when we may expect to see hundreds of stamps in operation, and gold flowing from that very rich portion of the mining belt. The spring is opening finely and all the mills are in full operation.

Washington Gazette: The venerable Dr. Lovick Pierce and his son, the bishop, spent last Saturday at General Town. The doctor preached in the morning and the bishop at night on last Sunday. The congregations were greatly impressed by the excellent sermons of these occasions.

Buena Vista Argus: A note from Schley county says: The Rev. W. R. Singleton, who is in his 70th year, put up with great help, a few days ago, 125 miles of fence, ten rails high, with green rails.

Mr. Reddick Perry, of that country, is another remarkable man. He is 90 years old and more sprightly than many men of fifty. We made mention of his age last year, and some time after, in the course of a conversation, he demanded of us "why we had thus spoken of him." We told him because it was so, and he deserved honorable mention, "and then you don't mind it, do you?" "Yes, I do," said he. "Why so?" we asked. "Because the oil workers, and I want to get another one."

Onethrope Echo: It is said that Mr. Thornton, who owns the place wherein Pemberton lived when he was murdered by Murchie, is very much agitated over unearthly noises and strange sights that it is impossible to account for. One day recently, while plowing in the spring of last year, the master heard a noise that sounded like the sound of a gun. The noise was so mysterious that he decided to stop work and quit the accused spot. A party was organized this week to ferret out the mystery. Of course it will be traced to some rational cause, and a good sensational item spoiled.

Gainesville Eagle: Our readers remember our statement that the little old woman of Mr. and Mrs. Wood, eighteen months old, was drowned about noon on Thursday in a tub of water. There are some facts connected with the sad event that are mysterious and incomprehensible. On the night before the death of the little child, the master of the house was dead, and during the same night the mother dreamed of seeing a well full of water and running over. Mr. and Mrs. Wood are persons of the highest respectability, living just outside the corporation, and the facts are fully authenticated. The story is as singular, to say the least, but without attempting an exposition.

Onethrope Echo: It is said that Mr. Thornton, who owns the place wherein Pemberton lived when he was murdered by Murchie, is very much agitated over unearthly noises and strange sights that it is impossible to account for. One day recently, while plowing in the spring of last year, the master heard a noise that sounded like the sound of a gun. The noise was so mysterious that he decided to stop work and quit the accused spot. A party was organized this week to ferret out the mystery. Of course it will be traced to some rational cause, and a good sensational item spoiled.

Onethrope Echo: The great bald steamer of the Southern Railroads in this county was killed by Mr. William C. Coleman on Saturday morning last. This sage, so says Mr. Coleman, has been known for five years in the section where he was killed, which is near the Laurens county line, opposite Mr. J. W. Nease. He has during that time been most popular, and the most popular man. We have measured the foot, which is exactly eight inches from point to point—one claw measuring three and a quarter inches, outside measurement. Mr. Coleman says he measured seven feet

and ten inches from tip to tip of his wings, and then he whipped three dogs after he was shot and one who bolted.

The bumble-bee is tuning up his bumble.

We almost feel like remarking to gentle Annie (of Covington) that the spring time has come.

THE DAILY CONSTITUTION: SATURDAY MORNING, MARCH 16, 1878.

Dr. Tutt's Pills.

The Greatest Medical Triumph of Modern Times.

Recommended by Physicians
Indorsed by Clergymen.These Pills have gained a world-wide reputation
throughout every country in the world.The Reason is Obvious.
They are no worthless nostrum, puffed up to deceive the credulous, but are the
result of a long course of study by a chemist and physician of thirty years' experience
in the use of herbs and roots.What Tutt's Pills will do.
They cure all diseases of the skin, and are
especially good for the cure of scrofula, rheumatism, and all
diseases of the blood.They cure all diseases of the body,
and especially good for the cure of scrofula, rheumatism, and all
diseases of the blood.They cure all diseases of the body,
and especially good for the cure of scrofula, rheumatism, and all
diseases of the blood.They cure all diseases of the body,
